1. INTRODUCTION

The original Ballarat West Development Contributions Plan (DCP) was approved by the Minister for Planning under Amendment C167 Development Contributions Plan on 30 October 2014.

The DCP was then revised in March 2017 in response to a change to the Community Infrastructure Levy cap introduced by a Governor in Council Order on 11 October 2016.

This document is an updated DCP prepared in 2025 in order to implement changes arising from the findings of a full DCP review undertaken by Council, which sought to revise the infrastructure needs, standards and costs to reflect the latest available information. This review included:

- Revised technical reports to review the need and scope of transport, drainage and community infrastructure;
- Consultation with the stakeholders involved with the delivery of the DCP; and
- Review and update the full infrastructure list, including scope and cost of items.

1.1. BALLARAT WEST DEVELOPMENT CONTRIBUTIONS PLAN

This Ballarat West Development Contributions Plan (DCP) has been developed to support the funding of infrastructure in the Ballarat West Precinct Structure Plan (PSP) area. This area is made up of three sub-precincts, Bonshaw Creek (sub-precinct 1), Greenhalghs Road (sub-precinct 2) and Carngham Road (sub-precinct 4). A combined Precinct Structure Plan has been prepared for each of these sub-precincts. The Precinct Structure Plan has been prepared by SMEC Urban in conjunction with the City of Ballarat.

The Precinct Structure Plan guides future development and sets the long-term strategic framework for the development in relation to:

- Land use (such as residential development of varying densities, retail, commercial uses, open space, education facilities and community facilities);
- Transport (such as the arterial and link road network, collector roads & proposed public transport);
- Activity centres (Major Activity Centre, Neighbourhood Activity Centre and Local Activity Centres); and
- Open space (passive & active), waterways and environmentally sensitive areas.

This DCP applies to the 3 sub-precincts as a single area and requires contributions from all landowners/developers in the area, with the exception of Crown land in sub-precinct 1. Public land is excluded from the Net Developable Area and therefore development contributions.

Improved social, economic, environmental and urban design outcomes are achieved through the provision of infrastructure early in the development of a new community. The delivery of key infrastructure in a timely and efficient manner is fundamental to sustainable outcomes in urban growth areas such as Ballarat West.

The Precinct Structure Plan requires a range of physical and social infrastructure as part of the development of the Ballarat West Growth Area. Not all of this infrastructure will be funded through this DCP.

This infrastructure is provided through a number of mechanisms including:

- Subdivision construction works by developers;
- Development contributions (community infrastructure levy and development infrastructure levy);
- Utility service provider; and
- Capital works projects by City of Ballarat, state government agencies and community groups.

Decisions have been made about the type of infrastructure most of which will be funded by this DCP, and these decisions are in line with the Ministerial Directions for Development Contributions.

This DCP has been developed in accordance with the provisions of Part 3B of the Planning and Environment Act and the Victorian State Government Development Contributions Guidelines (2003, updated 2007).

This DCP will require the payment of levies to ensure that the infrastructure specified in this plan is funded to enable City of Ballarat to provide the infrastructure.

It should be noted that the Development Infrastructure Levy in this DCP includes contributions towards drainage items as the City of Ballarat is the drainage authority. This should be taken into account when comparing levies with metropolitan Melbourne development infrastructure levies, which do not include a contribution towards drainage authority infrastructure.

2. STRATEGIC BASIS

2.1. LOCAL PLANNING POLICY CONTEXT

This DCP has been prepared to support the provision of infrastructure identified by the Ballarat West Precinct Structure Plan. Additionally, a number of strategic planning documents have been prepared by, or on behalf of City of Ballarat that identify the need, standard and costs for the infrastructure items that are included in this DCP.

This DCP has been prepared in close consultation with City of Ballarat officers. City of Ballarat officers have also provided strategic planning information and advice regarding costs for this DCP where appropriate.

Relevant supporting documents for the original DCP included:

- Precinct Structure Plan (SMEC Urban, 2012);
- Drainage Scheme (Engeny & SMEC, 2012);
- Traffic network and costings (SMEC, 2012);
- Community Infrastructure Assessment (CPG, 2010).
- Active Open Space and Community Facilities Infrastructure (COB, 2012); and
- Cost estimates provided by Prowse Quantity Surveyors (2012).

Additional supporting documents used to prepare this revised DCP include:

- Community and Recreation Infrastructure (ASR Research, 2024);
- Transport Projects Review (Milward, 2024);
- Drainage Strategy Update (Engeny, 2024); and
- Land Valuations for the Ballarat West Development Contributions Plan Review (Opteon 2024).

2.2. STATE PLANNING POLICY CONTEXT

The Ministerial Direction on the Preparation and Content of Development Contributions Plans (11 April 2025) outlines what may be funded with a development contributions levy, namely:

- Acquisition of land for roads, public transport corridors, drainage, public open space, community facilities;
- Construction of roads, including bicycle and foot paths, and traffic management and control devices;
- Construction of public transport infrastructure, including fixed rail infrastructure, railway stations, bus stops and tram stops;
- Basic improvements to public open space, including earthworks, landscaping, fencing, seating and playground equipment;
- Drainage works;
- Buildings and works for or associated with the construction of a maternal and child health centre, a child care centre, a kindergarten, or any centre which provides these facilities in combination.

The Direction also stipulates that a development contributions plan must not impose a development infrastructure levy or a community infrastructure levy in respect of the development of land for a non-government school; or housing provided by or on behalf of the Chief Executive Officer of Homes Victoria; or a small second dwelling. Government schools are not subject to payment of development contributions.

The Victorian State Government published a set of documents which make up the Development Contributions Guidelines (2003, updated 2007). The Development Contributions Guidelines are available through the Department of Transport and Planning (DTP) website. These documents provide guidance as to how DCPs are to be prepared and administered including the matters that DCPs are to consider.

2.2.1. PLANNING AND ENVIRONMENT ACT 1987

Part 3B of the Planning and Environment Act 1987 outlines the statutory provisions relating to development contributions. In summary, Part 3B provides for, amongst other things:

- The inclusion of a DCP in the planning scheme, for the purpose of levying contributions for the provision of works, services and facilities (section 46I);
- The provision to impose a development infrastructure levy and/or a community infrastructure levy (section 46J);
- The contents required of a DCP (Section 46K);
- The setting of limits in respect of a community infrastructure levy (section 46L);
- The provision for the Minister to issue written directions relating to the preparation and content of a DCP (section 46M);
- The collection of a development infrastructure levy, by way of a condition on a planning permit either requiring the payment of a levy within a specified time, or entering into an agreement to pay the levy within a specified time (section 46N);
- The collecting agency may accept the provision of land, works, services or facilities by the applicant in part or full satisfaction of the amount of levy payable (Section 46P (2)).

2.3. AREA TO WHICH THE DCP APPLIES

F1. DCP AREA MAP

Source: City of Ballarat

The Ballarat West DCP applies to the Ballarat West Precinct Structure Plan area (sub-precincts 1, 2 and 4) as shown in Figure 1.

The Precinct Structure Plan originally applied to approximately 1,290 hectares of land including:

- 707 hectares in sub-precinct 1;
- 296 hectares in sub-precinct 2; and
- 287 hectares in sub-precinct 4.

An audit of development and the land budget showed the area to now be 1,286 hectares.

The DCP adopts the Ballarat West Precinct Structure Plan area as the Main Catchment Area (MCA). The MCA is the geographic area from which a given item of infrastructure will draw most of its use. The MCA forms the entire charge area for collection of DCP levy amounts.

The MCA is treated as a single cell or catchment for the purposes of calculating levies. This is due to the consistent levels of infrastructure requirements and costs across the MCA and the operation of the MCA as a single catchment for broader infrastructure such as drainage.

2.4. TIMEFRAME TO WHICH THE DCP APPLIES

The DCP has a life of 25 years from the date that the DCP is incorporated into the Ballarat Planning Scheme (Amendment C234ball).

The risks associated with a longer life DCP will be mitigated through the provision for regular review of the DCP. Review provisions are included in Section 5.

3. INFRASTRUCTURE PROJECT JUSTIFICATION

Planning and technical reports have identified a need for each of the community and development infrastructure projects that have been included in this DCP. City of Ballarat has identified that each item is needed in order to provide for the wellbeing, health and safety of the future community.

The cost apportionment methodology adopted in this DCP relies on the nexus principle. The Main Catchment Area (MCA) for this DCP is deemed to have a nexus with an infrastructure item if the occupants of the MCA are likely to make use of the infrastructure item.

Developers have the option to develop at various dwelling densities within the range specified in the Ballarat West Precinct Structure Plan. Therefore, in order to fairly levy developers achieving varying densities while maintaining financial certainty for City of Ballarat, a 'per hectare of net developable land' demand unit is used for the collection of the Development Infrastructure Levy.

A 'per dwelling' demand unit is used for the collection of the Community Infrastructure Levy.

3.1. DISTINCTION BETWEEN COMMUNITY AND DEVELOPMENT INFRASTRUCTURE

This DCP makes a distinction between 'community' and 'development' infrastructure. As these terms are not clearly defined in the legislation, the Ministerial Direction and guidelines outline certain infrastructure which can be included as Development Infrastructure for the purposes of preparing a Development Contributions Plan.

The Community Infrastructure Levy is to be paid by the land owner at the time of building approval at a 'per-dwelling' rate. The Planning and Environment Act 1987 stipulates that the amount that may be contributed under a Community Infrastructure Levy is no more than \$1,150 for each dwelling for the 2018/19 financial year. This cap is \$1,450 per dwelling for the 2024-25 financial year.

The Development Infrastructure Levy is to be paid by developers at the time of development. Contributions relating to development infrastructure will be paid at a 'per- hectare of Net Developable Area' rate in respect of the development of land as specified in Table 14 of this document.

3.2. ITEMS NOT INCLUDED IN THE DEVELOPMENT CONTRIBUTIONS PLAN

The following infrastructure items are not included in the DCP, as they are not considered to be higher order items. They are assumed to be provided by developers as a matter of course:

- Local streets and collector streets (see the City of Ballarat road hierarchy for definitions), and associated traffic management measures,
- Local drainage works and any other drainage works not specifically included in this DCP;
- Intersections (and associated land required) connecting the development to the existing road network, except where specified as DCP projects;
- Water, sewerage, underground power, gas and telecommunications services;
- Local pathways and connections to the regional and/or district pathway network;
- Linear trails, for example along creeks;
- Basic levelling, water tapping and landscaping of passive open space;
- Passive public open space reserve master plans and agreed associated works required by the Precinct Structure Plan;
- City of Ballarat's plan checking and supervision costs; and
- Bus stops, as a requirement of planning permits.

3.3. FUTURE WESTERN LINK ROAD

The DCP includes a contribution towards the future Western Link Road by way of land acquisition. The DCP includes acquisition for the future Western Link Road reservation but does not include land required for eventual duplication. The DCP does not include Western Link Road construction which is to be funded through external sources. The level of contributions required towards the Western Link Road are shown in Table 12 and Appendix B.

3.4. COMMUNITY INFRASTRUCTURE ITEMS

City of Ballarat has identified a requirement for 11 Community Infrastructure items. Community Infrastructure items are identified in Table 1.

T1. COMMUNITY INFRASTRUCTURE ITEMS

Project Number	Project Name
CLCF_1	MAC Library (sub-precinct 1) co-located with Community Centre in MAC Construction of one branch library of 1,800 sqm (excluding canopies, verandas, etc) to be co-located with the community centre in MAC.
CLCF_2	Level 3 MAC Multi-Purpose Community Centre (sub-precinct 1) Construction of a level 3 multi-purpose community centre, which includes community rooms and meeting space, administrative spaces for staff and community groups and carparking within a building area of approx. 4,400 sqm.
CLCF_3	Level 1 MAC Early Years Hub (sub-precinct 1) (CI component) Construction of community infrastructure component of early years hub, including community meeting rooms and associated facilities, outdoor areas and parking.
CLCF_4	Level 1 Tait Street Early Years Hub (sub-precinct 1) (CI component) Construction of community infrastructure component of early years hub, including community meeting rooms and associated facilities, outdoor areas and parking.
CLCF_5	Level 1 LAC Multi-purpose Community Centre and Early Years Hub (sub-precinct 2) (CI component) Construction of community infrastructure component of LAC multi-use centre and early years hub, including community meeting rooms and associated facilities, outdoor areas and parking.
CLCF_6	Level 1 NAC Multi-purpose Community Centre (sub-precinct 2) (CI component) Construction of community infrastructure component of NAC early years hub, including community meeting rooms and associated facilities, outdoor areas and parking.
CLOS_1	MR Power Park - Pavilion Construction of a medium community pavilion to serve regional AOS Reserve.
CLOS_2	Mining Park - Pavilion Construction of small pavilion to serve the AOS Reserve - Gold Mining Area.
CLOS_3	Glenelg Highway reserve (MAC) - Pavilion Construction of medium pavilion to serve the AOS Reserve – MAC.
CLOS_4	Greenhalghs reserve (LAC) - Pavilion Construction of medium pavilion to serve AOS Reserve – LAC.
CLOS_5	Carngham reserve (NAC) - Pavilion Construction of a medium pavilion to serve AOS Reserve – NAC.

Source: City of Ballarat based on ASR, 2024

3.5. DEVELOPMENT INFRASTRUCTURE ITEMS

City of Ballarat has identified a requirement for a range of Development Infrastructure items. These Development Infrastructure items can be divided into 6 infrastructure categories being:

- Community Facilities;
- Drainage;
- Active Open Space;
- Roads;
- Traffic management; and
- Other (including DCP preparation).

Appendix A includes a set of infrastructure maps showing the location of these Development Infrastructure Items.

3.5.1. COMMUNITY FACILITIES

City of Ballarat has identified a requirement for 9 Community Facilities items.

Community Facilities items are identified in Table 2. This section includes land for community infrastructure items and community facilities.

T2. COMMUNITY FACILITY ITEMS

Project Number	Project Name
DL_CF_1	Level 1 MAC Early Years Hub (sub-precinct 1) (DI component) Construction of development component of early years hub, including kindergarten, maternal and child health centre and associated facilities, outdoor areas and parking.
DL_CF_2	Level 1 Tait Street Early Years Hub (sub-precinct 1) (DI component) Construction of development component of Early Years Hub, including kindergarten, associated facilities, outdoor areas and parking.
DL_CF_3	Level 1 LAC Multi-purpose Community Centre and Early Years Hub (sub-precinct 2) (DI component) Construction of development component of LAC Multi-purpose Community Centre and Early Years Hub, including kindergarten and associated facilities, outdoor areas and parking.
DL_CF_4	NAC Early Years Hub (sub-precinct 4) Construction of development component of NAC Early Years Hub, including kindergarten and associated facilities, outdoor areas and parking.
DL_LA_1	MAC Library (sub-precinct 1) - Land Land acquisition of 0.9 ha for the branch library.
DL_LA_3	Level 3 MAC Multi-Purpose Community Centre (sub-precinct 1) - Land Land acquisition of 1ha for integrated community facilities comprising multi-purpose community centre, with Early Years Hub comprising Kindergarten, Maternal and Child Health and flexible community space.
DL_LA_4	Level 1 Tait Street Early Years Hub (sub-precinct 1) - Land Land acquisition of 0.5 ha for Early Years Hub comprising kindergarten and flexible community space.
DL_LA_5	LAC Early Years Hub - LAC (sub-precinct 2) - Land Land acquisition of 1.3 ha of LAC Early Years Hub site co-located with Level 1 Multi-purpose Community Centre.
DL_LA_7	Level 1 MAC Multi-purpose Community Centre (sub-precinct 4) - Land Land acquisition of 0.7ha for level 1 Multi-purpose Community Centre collocated with the NAC in sub-precinct 4. Collocated with Primary School and Early Years Hub.

Source: City of Ballarat based on ASR, 2024

3.5.2. DRAINAGE

A drainage scheme has been developed for the entire Ballarat West Precinct Structure Plan area including drainage pipes, wetland/retarding basins and biofilters.

Drainage items are identified in Table 3. This section includes both encumbered and developable land for retarding basins.

T3. DRAINAGE ITEMS

Project Number	Project Name
DL_DR_A	Drainage Scheme in sub-catchment A (sub-precinct 4) Construction of a drainage scheme for sub-catchment A, including drainage pipes, retarding basins and bioretention areas.
DL_DR_AA/AB	Drainage Scheme in sub-catchment AA/AB (sub-precinct 1) Construction of a drainage scheme for sub-catchment AA/AB, including drainage pipes, retarding basins and bioretention areas.
DL_DR_AC/AT	Drainage Scheme in sub-catchment AC/AT (sub-precinct 1) Construction of a drainage scheme for sub-catchment AC/AT, including drainage pipes, retarding basins and bioretention areas.
DL_DR_AK/AM	Drainage Scheme in sub-catchment AK/AM (sub-precinct 1) Construction of a drainage scheme for sub-catchment AK/AM, including drainage pipes, retarding basins and bioretention areas.
DL_DR_AU/AY	Drainage Scheme in sub-catchment AU/AY (sub-precinct 1) Construction of a drainage scheme for sub-catchment AU/AY, including drainage pipes, retarding basins and bioretention areas.
DL_DR_AZ/CA	Drainage Scheme in sub-catchment AZ/CA (sub-precinct 1) Construction of a drainage scheme for sub-catchment AZ/CA, including drainage pipes, retarding basins and bioretention areas.
DL_DR_BA/BQ	Drainage Scheme in sub-catchment BA/BQ (sub-precinct 1) Construction of a drainage scheme for sub-catchment BA/BQ, including drainage pipes, retarding basins and bioretention areas.
DL_DR_BK/BL	Drainage Scheme in sub-catchment BK/BL (sub-precinct 1) Construction of a drainage scheme for sub-catchment BK/BL, including drainage pipes, retarding basins and bioretention areas.
DL_DR_BU/CP	Drainage Scheme in sub-catchment BU/CP (sub-precinct 1) Construction of a drainage scheme for sub-catchment BU/CP, including drainage pipes, retarding basins and bioretention areas.
DL_DR_BY/BZ	Drainage Scheme in sub-catchment BY/BZ (sub-precinct 1) Construction of a drainage scheme for sub-catchment BY/BZ, including drainage pipes, retarding basins and bioretention areas.
DL_DR_C/O	Drainage Scheme in sub-catchment C/O (sub-precinct 4) Construction of a drainage scheme for sub-catchment C/O, including drainage pipes, retarding basins and bioretention areas.
DL_DR_CB/CF	Drainage Scheme in sub-catchment CB/CF (sub-precinct 1) Construction of a drainage scheme for sub-catchment CB/CF, including drainage pipes, retarding basins and bioretention areas.
DL_DR_CD/CR	Drainage Scheme in sub-catchment CD/CR (sub-precinct 1) Construction of a drainage scheme for sub-catchment CD/CR, including drainage pipes, retarding basins and bioretention areas.
DL_DR_CQ/CW	Drainage Scheme in sub-catchment CQ/CW (sub-precinct 1) Construction of a drainage scheme for sub-catchment CQ/CW, including drainage pipes, retarding basins and bioretention areas.
DL_DR_CX/DC	Drainage Scheme in sub-catchment CX/DC (sub-precinct 1) Construction of a drainage scheme for sub-catchment CX/DC, including drainage pipes, retarding basins and bioretention areas.
DL_DR_D/J	Drainage Scheme in sub-catchment D/J (sub-precinct 4) Construction of a drainage scheme for sub-catchment D/J, including drainage pipes, retarding basins and bioretention areas.
DL_DR_KL	Drainage Scheme in sub-catchment KL (sub-precinct 4) Construction of a drainage scheme for sub-catchment KL, including drainage pipes, retarding basins and bioretention areas.

Project Number	Project Name
DI_DR_M/Q	Drainage Scheme in sub-catchment M/Q (sub-precinct 2) Construction of a drainage scheme for sub-catchment M/Q, including drainage pipes, retarding basins and bioretention areas.
DI_DR_P/T	Drainage Scheme in sub-catchment P/T (sub-precinct 2) Construction of a drainage scheme for sub-catchment P/T, including drainage pipes, retarding basins and bioretention areas.
DI_DR_U/Z	Drainage Scheme in sub-catchment U/Z (sub-precinct 2) Construction of a drainage scheme for sub-catchment U/Z, including drainage pipes, retarding basins and bioretention areas.
DI_LA_RB1	Retarding Basin 1 – Land Acquisition of land for Retarding Basin 1, total area: 0.9ha (developable).
DI_LA_RB2	Retarding Basin 2 – Land Acquisition of land for Retarding Basin 2, total area: 3.86ha (developable - non-residential).
DI_LA_RB3	Retarding Basin 3 – Land Acquisition of land for Retarding Basin 3, total area: 1.5ha (developable).
DI_LA_RB4	Retarding Basin 4 – Land Acquisition of land for Retarding Basin 4, total area: 1.15ha (developable).
DI_LA_RB5	Retarding Basin 5 – Land Acquisition of land for Retarding Basin 5, total area: 1.09ha (developable - non-residential).
DI_LA_RB6	Retarding Basin 6 – Land Acquisition of land for Retarding Basin 6, total area: 2.61ha (developable).
DI_LA_RB6a	Retarding Basin 6 (part a) – Land Acquisition of land for Retarding Basin 6A, total area: 1.6ha (developable).
DI_LA_RB6b	Retarding Basin 6 (part b) – Land Acquisition of land for Retarding Basin 6B, total area: 0.57ha (developable).
DI_LA_RB6c	Retarding Basin 6 (part c) – Land Acquisition of land for Retarding Basin 6C, total area: .14ha (developable).
DI_LA_RB7	Retarding Basin 7 – Land Acquisition of land for Retarding Basin 7, total area: 3.86ha (developable).
DI_LA_RB11	Retarding Basin 11 – Land Acquisition of land for Retarding Basin 11, total area: 1.9ha (both developable and encumbered).
DI_LA_RB12	Retarding Basin 12 – Land Acquisition of land for Retarding Basin 12, total area: 2.07ha (both developable and encumbered).
DI_LA_RB13	Retarding Basin 13 – Land Acquisition of land for Retarding Basin 13, total area: 2.37ha (both developable and encumbered).
DI_LA_RB14	Retarding Basin 14 – Land Acquisition of land for Retarding Basin 14, total area: 1.74ha (encumbered).
DI_LA_RB15	Retarding Basin 15 – Land Acquisition of land for Retarding Basin 15, total area: 2.25ha (encumbered)
DI_LA_RB17	Retarding Basin 17 – Land Acquisition of land for Retarding Basin 17, total area: 3.56ha (both developable and encumbered)
DI_LA_RB18	Retarding Basin 18 – Land Acquisition of land for Retarding Basin 18, total area: 1.04ha (developable)
DI_LA_RB24	Retarding Basin 24 – Land Acquisition of land for Retarding Basin 24, total area: 3.6ha (both developable and encumbered)
DI_LA_RB26	Retarding Basin 26 – Land Acquisition of land for Retarding Basin 26, total area: 1.43ha (developable)
DI_LA_RB27	Retarding Basin 27 – Land Acquisition of land for Retarding Basin 27 (RB27, SB27B, WL27), total area: 4.48ha (both developable and encumbered)
DI_LA_RB29	Retarding Basin 29 – Land Acquisition of land for Retarding Basin 29, total area: 3.43ha (developable)
DI_LA_SB30	Sediment Basin 30 – Land Acquisition of land for Sediment Basin 30, total area: 0.59ha (both developable and encumbered).

Source: City of Ballarat based on Engeny, 2024

3.5.3. OPEN SPACE

Passive open space land and improvements are provided by developers under Clause 53.01 of the Planning Scheme.

Active Open Space land and improvements are funded under this DCP. Note: sports pavilions are classified as Community Infrastructure and are described in Section 3.4.

Active Open Space items are included in Table 4.

T4. OPEN SPACE ITEMS

Project Number	Project Name
DL_LA_10	Active Open Space - (Crown Land) - Mining Park (sub-precinct 1) - Land Acquisition of Crown Land for the Mining Park Active Open Space Reserve: area 10.19ha.
DL_LA_11	Active Open Space - MAC (sub-precinct 1) - Land Land acquisition (3.5ha) for the Glenelg Highway (MAC) Active Open Space Reserve.
DL_LA_12	Active Open Space - LAC (sub-precinct 2) - Land Land acquisition (9.03ha) for the Greenhalghs LAC Active Open Space Reserve.
DL_LA_12a	Active Open Space - LAC (part a) (sub-precinct 2) - Land Land acquisition of 1ha for Indoor Recreation Centre adjacent to LAC (sub-precinct 2).
DL_LA_13	Active Open Space - NAC (sub-precinct 4) - Land Land acquisition (7.82ha) for the Carngham Road Active Open Space Reserve co-located with the NAC.
DL_OS_1	AOS Reserve at MR Power Park (sub-precinct 1) Construction of 4ha AOS Reserve at MR Power Park, including 1 football/cricket oval, regional play space, site establishment, water supply and car parking.
DL_OS_2	AOS Reserve - Mining Park (sub-precinct 1) Construction of the Mining Park Active Open Space reserve (10.19ha), including 3 soccer fields, local play space, water retention and car parking.
DL_OS_3	AOS Reserve - MAC (sub-precinct 1) Construction of Glenelg Highway AOS Reserve (3.5ha) adjacent to the MAC, including 2 soccer fields, 1 cricket pitch and car parking.
DL_OS_4	AOS Reserve - LAC (sub-precinct 2) Construction of 9.03ha Greenhalghs AOS reserve adjacent to the LAC, including 2 cricket/football ovals, 2 netball courts, local play space, water retention and car parking.
DL_OS_5a	AOS Reserve - NAC (sub-precinct 4) (part a) Construction of 3.98ha Carngham Road AOS Reserve adjacent to the NAC, including 1 oval, rectangular courts, local play space, shelter, toilets and car parking.
DL_OS_5b	AOS Reserve - NAC (sub-precinct 4) (part b) Construction of 3.84ha AOS Reserve - West, including 1 football/cricket oval, rectangular hard courts, local play space and car parking.
DL_OS_6	Indoor Recreation Centre (8 courts) adjacent to LAC (sub-precinct 2) Construction of Indoor Recreation Centre adjacent to the Greenhalghs AOS Reserve (8 courts).

3.5.4. ROADS

This DCP includes construction and land acquisition for new link roads, and upgrades to existing link roads, including land acquisition for widening.

Collector roads are excluded from the DCP and will be constructed/upgraded by adjacent development.

Road items are shown in Table 5.

T5. ROAD ITEMS

Project Number	Project Name
DLA_14	Western Link Road (Stage 2b) - Land Acquisition of land for the Western Link Road reserve (20m) between Carngham Road and Glenelg Highway: length 2650m, width 20m, area: 5.3ha.
DLA_15	Ascot Gardens Drive Extension - Land Land acquisition for Ascot Gardens Drive extension between existing road reserve and PSP area boundary: length 266m, width 24m, area: 0.64ha
DLA_16	Webb Rd Widening - Land Land acquisition to widen the existing 20m Webb Road reservation to 24m (total area to be acquired 0.26ha).
DLA_17	Schreenans Road widening - Land Land acquisition for Schreenans Road widening and roundabout with Cherry Flat Road: length 1050m, width 4m, area: 0.42ha
DLA_18	Schreenans Road extension (re-routed) - Land Land acquisition for re-routed Schreenans Road between existing reserve and Ross Creek Road: 287.5m x 24m, area 0.69ha.
DLA_19	Cobden Street extension (re-routed) - Land Land acquisition for re-routed Cobden Street between existing reserve and Ross Creek Road: 258m x 24m, area 0.62ha.
DLA_20	Cobden Street widening - Land Land acquisition for widening of existing Cobden Street reservation between Bonshaw Street and beginning of re-routed alignment. 4m x 1000m, area 0.40ha.
DLA_21	Cobden Street link to Bells Road - Land Land acquisition for new Cobden Street reservation to link southern limit of existing reservation with Bells Road. 24m x 35m, area 0.08ha.
DLA_22	New north south road in sub-precinct 2 - Land Acquisition of road reserve for new north south road in sub-precinct 2. Reserve width: 24m, length 1483m, area: 3.56ha.
DLA_23	Greenhalghs Road widening- Land Land acquisition for the widening of Greenhalghs Road between Wiltshire Lane and the future Western Link Road. Width: 4m, length: 2275m, area: 0.91ha.
DLA_24	New north south road in sub-precinct 4 - Land Land acquisition for new north south road reserve in sub-precinct 4: length: 2,458m, width 24m, area: 5.89ha.
DLRD_03a	New N-S Road (North) between Cuthberts Road and Cuzens Road Construction of new north-south road between Cuthberts Road and Cuzens Road to Link standard (747.5m).
DLRD_03b	New N-S Road (North) between Cuzens Road and Carngham Road Construction of new north-south road between Cuzens Road and Carngham Road to Link standard (747.5m).
DLRD_04	New N-S Road (North) between Carngham Road and sub-precinct 4 southern boundary Construction of new north-south road between Carngham Road and sub-precinct 4 Southern boundary to Link standard (675m)
DLRD_11	New N-S Road construction - sub-precinct 2 northern section Construction of the new north-south road between sub-precinct 2 northern boundary and Greenhalghs Road (758m).
DLRD_12	New N-S Road construction - sub-precinct 2 southern section Construction of the new north-south road between Greenhalghs Road and Glenelg Highway (462m).
DLRD_14	Greenhalghs Road upgrade - western section Upgrade of existing road to Link Road 1 standard between the north-south road (northern section) and future Western Link Road (632m).
DLRD_15	Greenhalghs Road upgrade - central section Upgrade of existing road to Link Road 1 standard between the north-south road (northern section) and the new north south road (southern section) (344m).
DLRD_16	Greenhalghs Road upgrade - eastern section Upgrade of existing road to Link Road 1 standard between the north-south road (southern section) and Wiltshire Lane (1035m).
DLRD_19	Cherry Flat Road Upgrade - Wiltshire Road to Webb Road Upgrade of existing road to Link Road between Wiltshire Lane and Webb Road (Length 320m).

Project Number	Project Name
DLRD_20	Cherry Flat Road Upgrade - Webb Road to Schreenans Road Upgrade of existing road to Link Road between Webb Road and Schreenans Road (Length 790m).
DLRD_21	Cherry Flat Road Upgrade - Schreenans Road to Bells Road Upgrade of existing road to Duplicated Link Road standard between Schreenans Road and Bells Road (Length 750m).
DLRD_22	Tait Street upgrade Upgrade of Tait Street between Ross Creek Road and sub-precinct 1 northern boundary to link road standard (780m).
DLRD_23	Cobden Street construction north Upgrade of existing Cobden Street and construction of re-routed (north) sections of Cobden Street between Ross Creek Road and Miles Street to Link standard (400m).
DLRD_24	Cobden Street construction south Construction of new Cobden Street extension between Miles Street and Bells Road to Link standard (480m).
DLRD_29	Ascot Gardens Drive and Webb Rd Construction of Ascot Gardens Drive and upgrading of Webb Road between PSP area boundary and Cherry Flat Road to Link standard (754m).
DLRD_31a	Schreenans Lane upgrade Upgrade of Schreenans Lane between Cherry Flat Road and Webb Road to Link standard (440m).
DLRD_31b	Schreenans Lane extension west Construction of Schreenans Lane between Webbs Rd and creek crossing to Link standard (340m).
DLRD_31c	Schreenans Lane Creek Crossing Construction of a creek crossing (bridge) for Schreenans Road.
DLRD_31d	Schreenans Lane extension east Construction of Schreenans Lane between Ross Creek Road and creek crossing to Link standard (2317m).
DLRD_38	Ross Creek Road Upgrade Upgrade of Ross Creek Road between Bells Road and Tait Street to link road standard (1080m).

3.5.5. TRAFFIC MANAGEMENT

The DCP includes construction of intersections of link roads and of link and arterial roads within the Ballarat West PSP area. Traffic management items are shown in Table 6.

Land within the Precinct Structure Plan area for future Western Link Road intersections is also included.

T6. TRAFFIC MANAGEMENT ITEMS

Project Number	Project Name
DLA_25	Western Link Intersections – Land Land acquisition to widen road reserves to accommodate intersection treatments and turning movements on the future Western Link Road, totalling 0.23ha.
DL_JNC_01	Carngham Rd / Dyson Rd Roundabout Construction of a 4 Arm 2 Lane Roundabout.
DL_JNC_02	Carngham Rd / New N-S Rd (North) Roundabout Construction of a 4 Arm 2 Lane Roundabout.
DL_JNC_04	Greenhalghs Rd / New N-S Rd (North) Roundabout Construction of a 3 Arm 1 Lane Roundabout.
DL_JNC_05	Greenhalghs Rd / New N-S Rd (South) Signalised Intersection Construction of a Signalised Intersection.
DL_JNC_08	Glenelg Hwy / New N-S Rd (South) Roundabout Construction of a 3 Arm 2 Lane Roundabout.
DL_JNC_09	Glenelg Hwy / Wiltshire Ln / Cherry Flat Rd Signalised Intersection Construction of a 4 Arm Signalised Intersection.
DL_JNC_10	Cherry Flat Rd / Webb Rd Signalised Intersection Construction of a 4 Arm Signalised Intersection.
DL_JNC_11	Cherry Flat Rd / Schreenans Rd Roundabout Construction of a 3 Arm 2 Lane Roundabout.
DL_JNC_12	Ross Creek Rd / Schreenans Rd extension/ Cobden St (realignment) Roundabout Construction of a 4 Arm 1 Lane Roundabout.

4. CALCULATION OF LEVIES

4.1. NET DEVELOPABLE AREA AND DEMAND UNITS

4.1.1. LAND BUDGET & NET DEVELOPABLE AREA

In this DCP 'Net Developable Area' (NDA) is the total amount of land within the MCA that has been determined to be able to be developed for urban purposes, excluding land for community facilities, government and non-government schools, open space, encumbered land (land for drainage reserves and conservation areas) and arterial and link road reserves. A summary of the land budget for the DCP is shown in Table 8.

A detailed land budget by title is included in Appendix C.

T8. SUMMARY LAND BUDGET

Description	Area (ha)
Total Area	1,285.50
Land for Roads (existing reserves and DCP roads)	84.99
Drainage and Conservation	96.96
<i>Sub-total</i>	<i>182.95</i>
Gross Developable Area	1,102.55
Active Open Space	36.48
Passive Open Space	64.59
Community Facilities	4.40
Government Education	20.56
Non-Government Education	3.5
<i>Sub-total Open Space, Community and Education</i>	<i>129.52</i>
Net Developable Area	973.03

Source: City of Ballarat 2024

It should be noted that the Precinct Structure Plan (PSP) allocates a 3.5 hectare site for a private school. Individual properties to which this use has been allocated under the preferred development scenario are identified in Appendix C of this document.

Where land within these preferred sites (as indicated with Plan 8 of the PSP - 'Future Urban Structure') is used for the primary purpose of a private school, land will be exempt from the requirement to pay the Development Infrastructure Levy.

In the event that land within these preferred sites is not used for the purpose of development of a private school, the Development Infrastructure Levy will apply unless otherwise agreed to by the Collecting Agency.

4.1.2. DEVELOPMENT INFRASTRUCTURE LEVY RATE TYPES

The Development Infrastructure Levy has been structured with two contribution rates:

- A rate for the development of Residential land, and
- A rate for the development of Commercial and Industrial land.

The allocation of the land within the NDA for each Development Infrastructure Levy rate type is shown in Table 9.

T9. BREAKDOWN OF NDA BY RATE TYPE

Description	Area (ha)
Net Developable Area	973.03
Residential	934.82
Commercial and Industrial	38.21

Source: City of Ballarat, 2024

4.1.3. COMMUNITY INFRASTRUCTURE LEVY

The Precinct Structure Plan provides for a range of lot sizes and housing types to satisfy the community. The projected dwelling yield of the MCA is 15,839 dwellings.

The projected number of lots is used as the basis for determining the number of demand units for calculation of the Community Infrastructure Levy.

4.1.4. DEMAND UNITS BY DEVELOPMENT TYPE

In this DCP, one hectare of Net Developable Area equates to one demand unit for the Development Infrastructure Levy. One dwelling equates to one demand unit for the Community Infrastructure Levy. The total number of demand units is shown in Table 10.

All development (residential and commercial) contributes to roads, traffic management, drainage and 'other' items. The costs of these items are apportioned based on the 'total' demand units.

Only residential development contributes to open space and community items. The costs of these items are apportioned based on the 'residential' demand units.

T10. DEMAND UNITS BY LAND USE AND TYPE

Levy Type	Community Infrastructure Levy	Development Infrastructure Levy	
DCP Rate Type	Residential Rate	Residential Rate	Total (residential and commercial)
Demand Units	Dwellings	Hectares NDA	Hectares NDA
Total Demand Units	15,839	934.82	973.03

Source: City of Ballarat, 2024; Urban Enterprise

4.1.5. NON-RESIDENTIAL USES IN A RESIDENTIAL AREA

Where residential land is subdivided into lots that are proposed to be used for a purpose other than a dwelling, a Development Contribution will be levied and must be paid, equivalent to the contribution which would otherwise have been paid if the land had been developed for dwellings. The whole of the land which is subdivided will be assessed on the basis of the demand units for Net Residential Developable Area.

4.1.6. RESIDENTIAL USES IN A COMMERCIAL AREA

The Mixed Use areas are likely to include dwellings; however there are no projections of dwelling yield available for these areas given the variety of land uses permissible. Any dwellings that are developed in these areas are also subject to the Community Infrastructure Levy.

Where Mixed Use land is subdivided into lots that are proposed to be used for residential purposes, a Development Contribution will be levied and must be paid, equivalent to the contribution which would otherwise have been paid if the land had been developed for commercial purposes. The whole of the land which is subdivided will be assessed on the basis of the demand units for Net Commercial Developable Area.

4.2. METHOD OF CALCULATING LEVIES

4.2.1. PROJECT COSTS

Each item in the DCP has a cost specified for either capital works or land purchase associated with that infrastructure project. Costings are based upon detailed provision standards and detailed cost estimates have been prepared for each item. These costs are detailed in the DCP Projects Sheets contained in Appendix B of this DCP. Construction costs are expressed in July 2024 dollars. Land costs are expressed in July 2024 dollars.

4.2.2. PROJECT TIMING

Each item in the DCP has an indicative provision trigger specified. The indicative provision trigger is based on City of Ballarat's best estimate of the time for delivery of each item based on forecast rates of development and logical staging of infrastructure provision.

These are indicative only and the actual delivery of items may vary at the discretion of the agency delivering the relevant infrastructure, having regard to a range of relevant factors and availability of funds. Further information on the timing and delivery of works is included in Section 5.

4.2.3. EXTERNAL DEMAND

For some infrastructure projects a proportion of usage is expected to be generated from areas external to the DCP. For each item in this DCP, the proportion of usage attributable to the external area has been specified.

The proportion of costs attributable to external use is subtracted from the total project cost of an infrastructure item to give the net cost attributable to the Main Catchment Area for each infrastructure item.

4.2.4. COST APPORTIONMENT METHODS

The cost of each of the infrastructure items has been apportioned based upon the likelihood that an item will be used by residents of the Main Catchment Area of the DCP.

The method and justification for the cost apportionment that has been used for each infrastructure item is outlined in the DCP Infrastructure Project Sheets (Appendix B).

4.2.5. USAGE NEXUS BY DCP RATE TYPE

Not all DCP Rate Types create a usage nexus with all infrastructure types.

The usage nexus of each DCP Rate Type with each infrastructure category is illustrated in Table 11.

T11. DEVELOPMENT TYPES INFRASTRUCTURE USAGE NEXUS MATRIC

Levy Type	Community Infrastructure Levy	Development Infrastructure Levy	
DCP Rate Type	Residential Rate	Residential Rate	Commercial Rate
Community Facilities	Yes	Yes	No
Drainage	No	Yes	Yes
Open Space	Yes	Yes	No
Roads	No	Yes	Yes
Traffic Management	No	Yes	Yes
Other	No	Yes	Yes

4.2.6. CALCULATION OF LEVY AMOUNTS

Levy amounts for each item are determined by dividing the cost apportioned to the MCA by the applicable Demand Units for that item. The total levy for each category of development is the sum of the individual levies generated by each applicable infrastructure item.

These calculations for each item are shown in Tables 12.

4.3. CALCULATION OF DEVELOPMENT CONTRIBUTION RATES

T12. CALCULATION OF DCP LEVY AMOUNTS

Infrastructure Code	Levy Category	Project Name	Estimated Works Cost	Estimated Land Cost	Total Project Cost	% to MCA	Cost to MCA	Development Types Contributing	MCA Demand Units	Residential Levy (July 2024 dollars)	Commercial Levy (July 2024 dollars)

4.3.1. SUMMARY OF COSTS AND CONTRIBUTIONS

Table 13 shows a summary of costs payable for each infrastructure category.

T13. SUMMARY OF COSTS

Summary - Total Costs Land and Construction	
Project Type	Total Costs of Projects Apportioned to the DCP
Estimated Project Cost: Land	\$88,763,250.00
Estimated Project Cost: Construction	\$381,851,402.22
Total	\$470,614,652.22

Summary - Total Costs Land and Construction	
Project Type	Total Costs of Projects Apportioned to the DCP
Community Facilities	\$69,331,652.23
Open Space	\$129,122,474.61
Roads	\$79,821,988.16
Traffic Management	\$13,630,863.24
Other	\$1,455,113.63
Total (excl. Drainage)	\$293,362,091.88
Drainage	\$177,252,560.34
Total	\$470,614,652.22

Source: Urban Enterprise

A summary of the development and community infrastructure contributions that are required to be made for development in the MCA are outlined in Table 14:

- These contributions are in July 2024 dollars. Table 14 will be indexed annually in accordance with the method specified in this DCP.
- The required Community Infrastructure Levy is outlined in Table 14. As at July 2024, the Community Infrastructure Levy is subject to a cap of \$1,450 per dwelling.
- The required Development Infrastructure Levy payable by infrastructure type per hectare of Net Developable Area is outlined in Table 14.
- All developable land is subject to the Development Infrastructure Levy. Only residential dwellings are subject to the Community Infrastructure Levy.

It should be noted that the Development Infrastructure Levy in this DCP includes contributions towards drainage items, as the City of Ballarat is the drainage authority. This should be taken into account when comparing levies with metropolitan Melbourne development infrastructure levies, which generally do not include a contribution towards drainage authority infrastructure.

T14. SUMMARY OF CONTRIBUTIONS

Summary - Development Infrastructure Levy (DIL) by Charge Area		
Charge Area	Rate (excl. Drainage) (July 2024)	Rate (July 2024)
Residential (per hectare NDA)	\$241,214.13	\$423,379.28
Commercial (per hectare NDA)	\$97,538.36	\$279,703.51

Summary - Community Infrastructure Levy (CIL) by Charge Area		
Charge Area	Rate before cap (July 2024)	Rate after cap (July 2024)
Residential (per dwelling)	\$4,049.70	\$1,450.00

Source: Urban Enterprise

* Community Infrastructure Levy capped at \$1,450 per dwelling.

4.4. CITY OF BALLARAT FUNDING

City of Ballarat is responsible for funding the shortfall in funds collected towards community infrastructure items due to the CIL cap. City of Ballarat is also responsible for funding 'external' apportionment of road items on behalf of existing development.

City of Ballarat's funding liability based on the original DCP, and the previous \$900 CIL cap is shown in Table 15.

T15. CITY OF BALLARAT FUNDING LIABILITY, ORIGINAL DCP

	Community Infrastructure	Development Infrastructure	Total
Total Infrastructure Cost	\$34,364,970	\$223,157,064	\$257,522,034
Costs Collected by DCP	\$12,848,400	\$188,866,723	\$201,715,123
Funding Gap (cost to City of Ballarat)	\$21,516,570	\$34,290,341	\$55,806,911

Source: Urban Enterprise

Based on the revised DCP costs, apportionment and revised CIL levy cap, City of Ballarat's funding liability is shown in Table 16. Note that due to approximately 39% of the land having received Statement of Compliance, the funding gap will not be equivalent to either of the results shown in Table 15 or 16. This means that development that has already occurred has made contributions under the original DCP levy and apportionment scenarios, while future development will contribute under the revised condition of this DCP.

T16. CITY OF BALLARAT FUNDING LIABILITY, REVISED DCP

	Community Infrastructure	Development Infrastructure	Total
Total Infrastructure Cost	\$64,143,130	\$449,901,822	\$514,044,952
Costs Collected by DCP	\$22,966,550	\$406,471,522	\$429,438,072
Funding Gap (cost to City of Ballarat)	\$41,176,580	\$43,430,300	\$84,606,881

Source: Urban Enterprise

5. DCP ADMINISTRATION

5.1. ADJUSTMENT OF VALUES & INDEXATION OF LEVIES

The Development Infrastructure Levy in this DCP will be adjusted annually according to the following specified method:

- In relation to the costs associated with all development infrastructure items other than land, the cost of those projects will be adjusted (and then the contribution amounts recalculated) by reference to the Producer Price Indexes Australia, Victoria Table 17. Output of the Construction industries, subdivision and class index numbers - Road and Bridge Construction Victoria (for roads, bridges, trails, drainage and open space items), Building Construction Victoria (for buildings) published by the ABS (Series 6427.0 or similar index) and the Consumer Price Index, Australia Tables 1 and 2. CPI: All Groups Melbourne (for other items) published by the ABS (series 6401.0 or similar). The adjusted costings will then produce a recalculated Development Infrastructure Levy and Community Infrastructure Levy.
- The revised infrastructure costs and the adjustment of the contributions will be calculated as at June 30th of each year.
- In relation to the value of land required under the DCP, a revaluation of all land projects is to be carried out annually in accordance with the principles set out in Section 5.2. The valuations are to be carried out by a qualified valuer and member of the Australian Property Institute to be appointed by City of Ballarat.
- The revised land value and then the resulting adjustment of the Development Infrastructure Levy will be calculated as at June 30th of each year.
- Within 14 days of the adjustments being made, the Responsible Authority must publish a notice of the amended contributions on its website.

If the Community Infrastructure Levy cap is increased in the future, Council reserves the right to collect the CIL as shown in this DCP and indexed in accordance with the DCP, up to a maximum of the new cap amount.

5.2. VALUATION OF LAND

The valuation assessments (Opteon, July 2024) for land required for infrastructure items in this DCP were carried out in accordance with the following principles, consistent with the original valuation methodology for the DCP:

1. Valuations were to be preliminary

Valuations provided were to be preliminary only, i.e. they were prepared using:

- a. the currently available information at the time in relation to the properties that were affected;
 - b. indicative information in relation to the land that was required; and
 - c. general guidance in relation to why the land was required.
2. Valuations were to take into account the specifics of the land required

In determining the value of land in the Ballarat West Precinct Structure Plan area the valuation should be based upon the current underlying zones taking into consideration normal site constraints and development considerations, but without reference to specific future uses shown on the Future Urban Structure plan from the Precinct Structure Plan.

3. Normal valuation principles applied

Whilst the valuations were "preliminary", normal valuation practices were adopted. For example, where only part of the land was required, valuations were carried out on a "before and after" basis. Comparable sales were analysed and compared to the affected properties as part of the valuation process. Normal valuation considerations such as location, topography, shape, views and development constraints were taken into account to the extent that there was readily available information.

4. Availability of services was assumed

It was assumed that all normal services were available for connection to the various parcels. It was acknowledged that future reviews of the valuations could take account of changes in the location and availability of services, when these become clearer.

5.3. COLLECTING AGENCY

The City of Ballarat is the Collecting Agency responsible for collection of levies pursuant to section 46K of the Planning and Environment Act 1987.

5.4. DEVELOPMENT AGENCY

The City of Ballarat is the Development Agency for all infrastructure items pursuant to section 46K of the Planning and Environment Act 1987.

5.5. PAYMENT OF CONTRIBUTION LEVIES AND TIMING

The DIL will be payable to and collected by the collecting agency, for the:

- Subdivision of land; or
- Development of land which requires a planning permit; or
- Development of land which does not require a planning permit, as set out in this DCP.

SUBDIVISION

A development infrastructure levy must be paid to the collecting agency for the land, after certification of the relevant plan of subdivision but not more than 21 days prior to the issue of Statement of Compliance in respect to the relevant plan or, otherwise included in an implementation agreement under Section 173 of the Act.

Where the subdivision is to be developed in stages, the infrastructure levy for the stage to be developed may only be paid to the collecting agency within 21 days prior to the issue of a Statement of Compliance.

Additionally, a Schedule of Development Contributions must be submitted with each stage of the plan of subdivision. This schedule must show the amount of the development contributions payable for each stage and the value of the contributions made in respect of prior stages to the satisfaction of the collecting agency or, otherwise included in an implementation agreement under Section 173 of the Act.

If the collecting agency agrees to works and/or provision of land in lieu of the payment of the infrastructure levy, the landowner must enter into an agreement under Section 173 of the Act in respect of the proposed works and/or provision of land in kind to specific requirements.

DEVELOPMENT OF LAND WHERE NO SUBDIVISION IS PROPOSED

Provided an infrastructure levy has not already been paid on the subject land, an infrastructure levy must be paid to the collecting agency. Payments must be in accordance with the provisions of the approved DCP for each demand unit proposed to be developed prior to the commencement of any development (i.e. development includes buildings, car park, access ways, landscaping and ancillary components).

The collecting agency may require that development infrastructure levy contributions be made at either the planning permit or building permit stage.

If the collecting agency agrees to works and/or provision of land in lieu of the payment of the infrastructure levy, the land owner must enter into an agreement under Section 173 of the Act or propose another arrangement acceptable to the collecting agency in respect of the proposed works and/or land to be provided in kind.

DEVELOPMENT NOT REQUIREMENT A PLANNING PERMIT (NO SUBDIVISION)

The following requirement applies where no planning permit is required. The land may only be used and developed subject to the following requirements being met:

- Prior to the commencement of any development, a development infrastructure levy must be paid to the collecting agency in accordance with the provisions of the development contribution plan for the land unless some other arrangement has been agreed to by collecting agency in a Section 173 agreement; or
- If the collecting agency agrees to works and/or provision of land in lieu of the payment of the infrastructure levy, the land owner must enter into an agreement under Section 173 of the Act in respect of the proposed works or provision of land which are proposed to be provided in kind.

COMMUNITY INFRASTRUCTURE LEVY

The Community Infrastructure Levy must be paid to the Collecting Agency prior to the issue of a Building Approval for any dwelling in accordance with section 46(0) of the Planning & Environment Act (1987). Developers / landowners are encouraged to pay the CIL before the issue of a Statement of Compliance to simplify collection of development contributions, reduce the administrative burden on Council and facilitate the early provision of community infrastructure.

The Community Infrastructure Levy is payable on a per dwelling basis and for the purposes of the CIL a dwelling also includes each occupancy or independent living unit within a retirement / residential village, retirement living developments or the like. (e.g. a Retirement village with 20 independent living units must pay 20 CIL amounts).

A small second dwelling is exempt from the requirement to pay the Community Infrastructure Levy.

5.6. ADMINISTRATIVE PROCEDURES

The City of Ballarat will undertake ongoing accounting and review of this DCP in terms of:

- The relevance of projects listed in the DCP;
- The level of contributions collected;
- The construction costs of infrastructure projects;
- The land costs of infrastructure projects;
- Updating the DCP to reflect any relevant amendments to the Planning and Environment Act, or any new Ministerial Directions relating to development contributions.

City of Ballarat will undertake a full review of this DCP at least every five years during the lifespan of the DCP.

Funds collected through development contributions will be held in a specific interest- bearing reserve account in accordance with the provisions of the *Planning and Environment Act* (1987). All monies held in this account will be used solely for the provision of infrastructure as itemised in this DCP.

If City of Ballarat resolves not to proceed with any of the infrastructure projects listed in this Development Contribution Plan, the Responsible Authority will comply with section 46Q of the *Planning & Environment Act* (1987).

5.7. METHOD OF PROVISION

Responsibility for the delivery of infrastructure items in this DCP resides with the City of Ballarat as Development Agency.

City of Ballarat as the Collecting Agency and Development Agency may agree to infrastructure items being provided by developers with a credit of offset provided against their development contribution obligations under this DCP (see Section 6 - Implementation Strategy).

6. IMPLEMENTATION STRATEGY

6.1. PROVISION OF LAND AND WORKS IN-KIND

Payment of development contributions is generally to be made in cash in accordance with Section 5.

Alternatively, infrastructure works and land may be provided by developers in return for a credit against their development contribution obligation, subject to the agreement of City of Ballarat at its absolute discretion. In determining whether to agree to the provision of works in lieu of cash City of Ballarat will have regard to any relevant matter including:

- Only works or land funded by the DCP can be provided “in-kind”;
- Works must be provided to a standard that generally accords with the DCP unless agreed between City of Ballarat and the developer;
- Detailed design must be approved by City of Ballarat and generally accord with the standards outlined in the DCP unless agreed by City of Ballarat and the developer;
- The construction of works must be completed to the satisfaction of City of Ballarat;
- The impact on the DCP must be cost and revenue neutral.

Where City of Ballarat agrees that works are to be provided by a developer in lieu of cash contributions:

- The credit for the works provided shall be granted only once the trigger for provision of the relevant item is reached;
- The credit for the works provided shall be an amount up to the value identified in the DCP, taking into account the impact of adjustment outlined in Section 5.1;
- The value of works provided in accordance with the principles outlined above will be offset against the development contributions liable to be paid by the developer;
- The developer will not be required to make cash payments for contributions until the value of any credits for the provision of agreed works-in-kind are exhausted;
- Where credit for works-in-kind can't be offset against future levy payments the developer will be reimbursed by City of Ballarat for any excess credit. The details of any reimbursement must be negotiated with and agreed to by the Collecting Agency and Development Agency;
- Where a developer chooses to bring forward works ahead of the scheduled time in the DCP this can be done subject to agreement by City of Ballarat and provided the impact on the DCP is cost and revenue neutral;
- Developer delivered projects will only qualify for the contingency component of the project where the developer can demonstrate to the satisfaction of the responsible authority that the contingency component can be reasonably claimed.

Notwithstanding that Council has ultimate discretion in relation to allowing others to deliver DCP infrastructure projects, City of Ballarat cannot be expected to deliver all of the infrastructure projects itself according to time lines determined by developers' staging requirements. It is therefore the expectation of City of Ballarat as Collecting Agency that most of the infrastructure projects funded by this DCP will be delivered by developers as works-in-kind in accordance with an agreement in writing. This particularly applies to projects such as roads works, intersections, drainage and open space.

To coordinate the provision of infrastructure, Schedule 2 to the Urban Growth Zone (UGZ2) requires an application for a residential subdivision of 10 or more lots to be accompanied by a Public Infrastructure Plan (PIP), which addresses the following, as applicable:

- the provision, staging and timing of stormwater drainage works;
- what land may be affected or required for the provision of infrastructure works;

- the provision, staging and timing of roadworks internal and external to the land consistent with any relevant traffic report or assessment;
- the landscaping of any land;
- the provision of public open space and land for any community facilities;
- what, if any, infrastructure set out in the Ballarat West Development Contributions Plan is sought to be provided as "works in lieu" subject to the consent of the Collecting Agency; and
- any other matter required by the Responsible Authority.

Through the approval of these agreements, City of Ballarat (acting as the Collecting Agency) will consider if and what infrastructure should be provided as works-in-kind under this DCP in accordance with Section 46P of the Act. The agreement must include a list of the DCP infrastructure projects which the Collecting Agency has agreed to in writing, and detailing if the projects are to be provided as works and/or land in lieu.

6.2. LAND

City of Ballarat intends to obtain land required under the DCP as an off-set against a developer's development contributions where feasible. As with works-in-kind, the provision of land would be set out in an agreement between the developer and City of Ballarat pursuant to Section 173 of the Planning and Environment Act 1987. The value of the off-set for providing land will equal the value shown in the DCP, subject to indexation, as outlined in Section 5.1, except where the extent of the land required is materially different to what is in the DCP, in which case the off-set will be limited to the value of the land actually provided.

6.3. SUGGESTED WORKS IN-KIND

City of Ballarat encourages developers to discuss and agree with City of Ballarat, the potential for provision of works and land to offset their development contribution. A major aim is to ensure that the timing of infrastructure delivery appropriately supports development.

City of Ballarat is proposing to construct the Community Centre items given the need to comply with statutory requirements relating to maternal child health and kindergartens. However, City of Ballarat could consider developers providing this infrastructure on a case by case basis.

6.4. STAGING

The indicative triggers for the delivery of infrastructure projects shown in the DCP will be considered in conjunction with the staging provisions of the PSP.

Credit for works provided in-kind is only allocated in accordance with an agreement between the Collecting Agency and the developer. If works provided in-kind incur an additional construction cost due to being "out-of-sequence", this does not constitute grounds for claiming the contingency amount associated with that item.

6.5. DRAINAGE

The drainage scheme has been designed to service the development with infrastructure that is optimal in terms of cost and performance while protecting properties, existing waterways and the environment. The drainage scheme being funded is explained in greater detail in the Ballarat West PSP and updated Engeny Drainage Report (2024).

Construction works for the drainage scheme will be completed in stages over the life of the DCP. It is anticipated that many of the components of the drainage works will be delivered by developers as works in-kind subject to the consent of Council as the Responsible Authority and Development Agency. However, in order to ensure an orderly delivery of the drainage scheme Council will prepare an annual capital works program of works to be undertaken year on year. Prioritisation of the scheme's works will include:

- Allocation of funding over the life of the Ballarat West PSP, the flow of funding from the Ballarat West DCP and any medium term capital works plan developed by City of Ballarat;
- The rate of development within each sub-catchment;
- The estimated total cost of the downstream works required to provide trunk drainage for an individual parcel; and
- The likely timing of other civil infrastructure including sewerage and roads.

City of Ballarat as the Development Agency under this DCP will generally undertake drainage scheme works from the downstream end first as it ensures that all properties in the sub-catchment receive the benefit of these works and are not adversely impacted by additional flows. Where works are not 'out-of-sequence', these works are more likely to be considered favourably in terms of Council consenting to them being constructed in conjunction with development as an in-kind contribution.

If finances under this DCP are not available to deliver drainage infrastructure landowners may:

- Submit proposals for works in kind which defray or avoid costs for drainage infrastructure accounted for in the DCP which enhance the financial position of the DCP;
- Fund the required drainage works themselves, and seek reimbursement when funds become available to the Collecting Agency.

For sub-catchments with larger landholdings, developers will be encouraged to pool resources to fund permanent drainage works, rather than constructing temporary drainage works for individual development sites. Where landholdings are more fragmented, this may affect the rate at which development can be expected to occur and in turn, the timing of new shared drainage works.

OUT OF SEQUENCE DEVELOPMENT

Developments may be required to provide temporary works where development is 'out-of- sequence' for drainage provision. Where temporary works are required, credits to offset development contributions liabilities will not be granted unless the Collecting Agency is satisfied that granting a credit will not undermine the funding of permanent infrastructure to be funded by the Ballarat West DCP and that the temporary works can be utilised as part of the works funded through the DCP.

If a developer provides a drainage solution to service its development that benefits the DCP and results in significant savings to the DCP finances, The Collecting Agency may consider providing a partial rebate of development contributions for drainage. This will be assessed on a case-by-case basis.

DELIVERY OF DRAINAGE SCHEME IN OTHER WAYS

The Ballarat West PSP explicitly recognises that water management solutions may vary from the drainage scheme envisaged in the PSP provided the technical engineering and water quality requirements needed to protect urban areas from flooding are adhered to.

For example, the stormwater treatment areas proposed in the drainage scheme have been sized assuming there are no rainwater tanks in the catchment as a conservative approach for preliminary sizing. Modelling assumptions such as this can be revisited when more information becomes available on the design of individual developments.

Consequently, if savings are achieved in the way the drainage scheme is envisaged to be delivered, the Collecting Agency may compensate a developer or recognise the savings for design innovations that financially benefit the scheme by lowering its cost. This saving might be within a precinct or potentially, across the catchment. The level of recognition of any cost savings will be based on the particular circumstances relating to each solution.

DESIGN STANDARDS FOR DRAINAGE

Non-scheme works will generally be required to meet relevant design standards. Key design standards for the DCP area are as follows:

- Downstream flows must be no greater than pre-development levels;
- Stormwater management should promote conservation and re-use of stormwater for non-potable purposes;
- All new development is to be protected from the 1 in 100 year flood, and have no adverse effects on downstream or neighbouring properties;
- The local drainage system will have capacity to process a 1 in 5 year storm event;
- The trunk drainage system will have capacity to process a 1 in 10 year storm event;
- Water quality is to be treated to best standard practice (currently 45% reduction in total nitrogen and phosphorus and 80% reduction in total suspended solids);
- Development should protect and enhance the environmental, social (including heritage) and economic values of waterway.

Developers will be strongly encouraged to promote water recycling and stormwater harvesting in accordance with the PSP, including for irrigation of public land.

These standards are in addition to the requirements of the planning scheme for particular developments.

Council should be consulted directly for specifications for particular drainage projects identified in the DCP.

REVIEWS

The scheme requires financial, engineering and environmental reviews on a regular basis to ensure costs are neither over nor under recovered and up-to-date requirements are met. Financial reviews will occur on an annual basis as part of setting the capital works program. Engineering reviews of the drainage scheme will be undertaken as part of regular reviews of the Ballarat West PSP and the Ballarat West DCP (approximately five-yearly). These will address the changing circumstances of the scheme, changes to engineering and environmental standards, revisions to climate change forecasts and so forth.
